

Cozy MKIV - Unofficial Documents to Share

I created a few computer order forms in the AMI PRO and MS Word word processor, with tables and automatic totalization (at least in AMI PRO). I've got (all zip'ed):

- Order Form for Aircraft Spruce and Specialty - AMI PRO
- Order Form for Aircraft Spruce and Specialty - MS Word
- Order Form for Wicks Aircraft - AMI PRO
- Order Form for Wicks Aircraft - EXCEL 4.0 (Thanks to Keith Barr)
- Order Form for Wicks Aircraft - MS Word
- Order Form for Ken Brock MFG - AMI PRO
- Order Form for Ken Brock MFG - MS Word

I fill them out and then fax them to the vendors with a fax-modem. Works GREAT!

I created a cost spreadsheet in Lotus 123 to examine the relative costs of different vendors, as well as to evaluate the costs of different options. It's pretty raw, and needs some work, but here it is (in WK4 format, zip'ed):

- Spreadsheet for: cost - WK4

Nigel Field created a spreadsheet for Weight and Balance Calculations for the COZY MKIV. This is in WK4 format

- (for Lotus 123), zip'ed:

- Spreadsheet for: Weight and Balance - WK4

Nigel also created a spreadsheet for doing the stress calculations for his propeller fabrication technique. this is a MS

- Excel format file, zip'ed:

- Spreadsheet for: Propeller Stress Calculations - XLS

Al Wick and Tim Hustad have created spreadsheets for Time Tracking for the COZY MKIV These are pretty spiffy.

- These exist in XLS format (for MS EXCEL), zip'ed:

- Al Wick's Spreadsheet for: Time Tracking - XLS

- Tim Hustad's Spreadsheet for: Time Tracking - XLS

(Remember to set "Load to Local Disc" or the equivalent on your browser - you don't want [unless you've got AMI PRO, MS Word Excel and/or 123 set up as viewers] to try to view these on-line).

Larry Jansch scanned in a COZY photo for use as "wallpaper" for your PC/Mac. You can download these JPG images here and convert them to BMP format with an image editor.

Wallpaper Image(s)

For those of you still using "DOS" I have the PKZIP/PKUNZIP self-extracting archive package available here for downloading. Remember, this is Shareware, not Freeware, so if you keep it and use it, please pay the registration fee. Again, use the "Load to Local Disc" (or equivalent) option to get this file:

PKZIP for DOS

Alternatively, you can access the PKWARE web site directly to download Win95/98 versions (and others) of the ZIP program, or you can go to shareware.com and get "Winzip", or the equivalent.
