

WING TIP "LITE COVERS"

BY
ANTHONY'S of SOLVANG

Anthony's "LITE COVERS" - Style A is made of durable yet flexible clear plastic material and will not yellow with age. This cover was developed for use on a variety of homebuilt aircraft with the same wing tip contour such as the Vari Eze, Long Eze and the Cozy.

This material can be trimmed with regular scissors and drilling is done without fear of shattering or splitting.

Van Snow of Santa Ynez, California was the first to have the Anthony "LITE COVERS" Style A installed on his Long EZe. Van has been racing in various events around the country and is considered to have one of the fastest Long EZe flying. Along with his mechanic, electronic and fabricating buddy Eric Cobb, they are constantly striving for perfection in performance and efficiency. Eric has a Long Eze of his own and is the first to use the Style B "LITE -COVERS" as seen on the back of this sheet.

WING TIP LITE COVERS

(Style B)

"LITE -COVER" Style B was designed for the same Homebuilt Aircraft as Style A. This style is for the individual that does not want to cut his or her wing tips and has a light unit that is visible from three directions. Front, Back and Side views.

Style B "LITE-COVERS" are mounted on the end of the wing surface as shown in the drawing below.
