[The Canard Aviators's Mailing list]

FWIW, The fuel tank primer & sealer recommended by Lancair (which I used) and advertised in their catalog as "PRC #420 orange primer. This is recommended for all fuel tanks which are made from composites. Comes in ½ pints. (two part) Generally two kits are required for standard tanks.)" Lancair part No. 05-11.

" Fuel Tank Sealer- # 1422A. Used as the primary fuel tank sealer. Applied over #420 primer. Requires two good coats per surface. Comes in pint kits (two part). Smells bad, works good. (Generally five kits are required for standard tanks). Lancair Part No. 05-12 As quoted from a Lancair Catalog of Options .

I am certain that these products can be purchased from Nieco Aviation Inc., at an eye opening price.

Foster Hancock V-Ez #1680 in work
