

INCREASE your FUEL AWARENESS

Defiant Fuel Indicator w/sump level

Long EZ Fuel Indicator

Real time indication of fuel quantity with low-level fuel alarms is now available for your aircraft. Capacitive fuel cell probes from 3 inches to over 8 feet are available to fit metal and composite tanks.

Retrofit existing tanks with easy installation hardware kit in one day. These probe assemblies are manufactured to the highest quality standards and are furnished factory calibrated to your tank.

Dual indicator system is microprocessor driven and features low tank alarm, return to zero needles, 240 degree scale lengths, external outputs for annunciators, and made-up cables and connectors.

Single indicator system is an analog driven system with a 200 degree needle scale. System has low level alarm and is furnished complete ready to install with all cables and hardware.

All fuel systems are fully tested and warranted for 2 years after going into service.

FEATURES

- Easy Installation
- No moving parts in fuel tank
- Low Power
- Everything Included in Kit
- Easy to follow Instructions
- Retrofits to existing tanks
- Outstanding Accuracy
- 2 Year Warranty
