

# Canard Pusher Pressure Recovery Spinner

Improve cooling and ease of prop maintenance. Three sizes available and two cone styles.

Bullet or Stinger cone mount to an aluminum bulkhead, which is mounted to the propeller crushplate as you mount the propeller. The cone covers the assembly, matching the propeller hub diameter for a clean, aerodynamic look.

*To build your spinner I need the following data:*

- Propeller bolt pattern (SAE 1 0r 2)
- Crush plate diameter and thickness
- Propeller bolt size
- Desired cone style
